Better Health for All

Social Determinants of Health

Social and economic factors play a large role in people’s health. Here are some of the indicators of the social determinants of health.

Education Levels

One in nine adults in our Region does not have a high school education.

More urban adults in our Region have a post-secondary education than adults living in rural areas.

Employment

Unemployment has nearly doubled in the Saskatoon area over the past 10 years.

Education matters: 80% of those employed have at least a high school education. Only 62% of those without a high school education are employed.
Better Health for All

Social Determinants of Health

Social and economic factors play a large role in people's health. Here are some of the indicators of the social determinants of health.

Income

<table>
<thead>
<tr>
<th></th>
<th>Saskatoon</th>

<tbody>
<tr>
<td>Lowest</td>
<td>$20K</td>
<td>$25K</td>
</tr>
<tr>
<td>Highest</td>
<td>$200K</td>
<td>$120K</td>
</tr>
</tbody>
</table>

The median income of individuals living in our highest income neighbourhood is ten times higher than that of the lowest income neighbourhood. The gap is not as wide in rural areas of our Region.

Low Income

About 1 in 5 children under 6 years old lives in low income households in our Region.

Housing Affordability

Average house prices in Saskatoon have more than tripled.

Saskatoon: 2000 $106,000, 2016 $342,000
Rural: 2000 $106,000, 2016 $342,000

1 in 4 households in our Region experiences housing affordability challenges.
